ABSTRACTED-PUB-NO: RU 2099065C

BASIC-ABSTRACT:

A gel preparation for treatment of local complications in standard anti-tumour treatment of the oropharyngeal zone contains lactoferrin (LFG) as antioxidant, gelatin and Na phosphate buffer.

USE - The method is useful in the prevention and treatment of local complications in result of chemo-radiation therapy in the

oropharyngeal zone.

ADVANTAGES - The method avoids some of the drawbacks of previous preparations, e.g. the low effectiveness and the long treatment time (3-4 weeks) for vitamin preparations, and the 3-4 weeks for DMSO , lack of accurate dosage and the low antioxidant activity.
